Program Business

Many of you have probably never heard of this concept. It can be a lifetime HUGE INCOME GENERATOR for your agency.

HYPOTHETICAL EXAMPLE:

You have a client or access to an association who specializes in a unique industry or business opportunity – say a major lender ready to get involved in a specialized loan program in your state or nationally, who wants to design an accompanying insurance opportunity.

Lender is willing to loan construction and completion financing opportunity for gun ranges (hypothetical.) The lender does their homework and determines there is a \$300 million loan potential. Lender comes to you to design a builders risk and then completed operations and package worth \$20.0 Million in premium..... Imagine the potential commission on this one, all running through your shop!

SIMG is currently working on just such a “program” that can generate millions of premium on a national scoped business.

Let us help you conceptualize and design, and find a carrier partnership for a “program business” idea or plan you may have lurking in your neighborhood, files, or relationships. It may just be that home run you may need to make your career, and generate income you have only dreamed about.
